Declaration by the Controller of Examinations on Automation of Examination Division:

This is to certify that an **100% automation** of the entire activities of Examination Division has been implemented through installation and operation of in-house made and indigenously built software (EMS) developed by a team of our internal experts.

EMS involves automation of multiple activities or steps which are chronologically represented as follows:

Creation of Academic Session → Includes newly admitted student → Creation of Examinations with respective academic session → Paper Configuration by the respective HOD's → Examiner and Reviewer Allocations → Appointment letter generation for Paper setter and Examiners → Submission of marks by the individual examiner using their User ID and Password → Processing of all the UG, PG and PhD Coursework Examinations results → Tabulation Sheets (TS) and Result Sheets (RS) generation.

Also at any point of time during the year Students Academic Verifications are being done with the help of the EMS.

Students Registration for Examinations, Hall tickets (Admit Card) issue and processing & publication of results and also students application for Post Publication Review after publication of results are all being managed using our in-house Softwares.

Generation of Grade Cards and Degree Certificates are also being done at the department using confidential stationery.
