

Brief report regarding the programme on

Blood Donation Camp

Organised by NSS cell, Presidency University

Date – 17th May, 2022

17th May 2022 -Blood Donation Camp on *May 17th, 2022* - NSS cell On May 17, 2022, NSS cell Presidency University organised a blood donation camp in collaboration with SSL and PUSC. Blood donation is the practise of giving blood to others in order to assist them with their medical issues. One of our body's most crucial fluids, blood is necessary for its proper operation. Blood loss can lead to fatal diseases and even death if it is excessive. Thus, it is clear how giving blood literally saves lives and benefits people. In addition, it binds people despite differences in caste, creed, religion, and other categories.

This camp's collected blood was donated to the *Central Blood Bank of West Bengal Health Department*. Students, professors, and many University staff members (more than 100 donors) took part in this blood donation drive to make the program successful. In order to develop additional awareness programmes, a study was conducted to evaluate the knowledge, attitude, and practises among the voluntary donors.

Blood shortages are a common occurrence in healthcare environments and are caused by an imbalance between the rising demand for safe blood and blood products on the one hand and the inability to organise a regular blood supply as a result of misunderstandings, risks, and harms that donors perceive, and a lack of motivation on the part of potential donors.

Young people are the world's future and hope for a secure blood supply because blood has the power to save millions of lives. Blood transfusion is essential for health care systems, which increases life expectancy and quality of life for those with chronic diseases or life-threatening acute illnesses.

The experience throughout the initiative's entire journey was really illuminating. The organising team and donors' enthusiasm inspired all of the staff, students, and professors to participate in the contribution. The event's success has further inspired me to carry out such awareness-raising events in the future.

There is a need for several initiatives of this nature and motivational campaigns aimed at young adults. By inspiring people and giving them chances to donate blood

regularly voluntarily, we should work to incorporate their knowledge, awareness, and good attitudes into the application.
